The Social Science Division has developed five broad goals.

1. Students will be prepared for graduate study. This preparation will include a knowledge base in the social sciences, analytical and critical thinking skill, and study/research skills.
2. Students will develop interpersonal skills necessary for professional careers, including oral and written communication and an understanding of human behavior.
3. Students will grow in self-understanding by understanding the historical and social contexts of their lives and of the institutions in which they live.
4. Students will learn how to integrate their knowledge of Social Science with Evangelical Christian faith.
5. Students will develop a "World Christian" perspective, which means they develop the ability to work in cross-cultural settings, as well as understanding how their lives and ministries fit into world missions.

In special cases, courses other than those listed below may be used as cognates or electives in the major and/or minor with documented approval of the student's academic advisor, the Social Science Division chair and a representative from the Academic Services Office.

A limit of two graduate courses may be used as undergraduate cognates. Permission must be obtained from the academic advisor, division chair and course instructor.
