

School of BUSINESS & SOCIAL SCIENCES

The School of Business and Social Science is committed to developing servant leaders through the integration of Christian faith with the disciplines represented. Students are expected to excel in content knowledge, as well as research, critical-thinking and communication skills. Students will have opportunities to develop a world-wide Christian perspective on service and diverse cultures.

Mission Statement

The mission of the department of business is to develop servant leaders who are biblically and ethically grounded, culturally sensitive, and professionally and academically competent.

The department of business challenges students to think critically and creatively, nurtures individual development, integrates the school's Christian tradition and prepares students for a life ministry in a global environment.

The department of business has received accreditation from the International Assembly for Collegiate Business Education (I.A.C.B.E.).

Accounting Major

The accounting major provides a broad study of financial and management accounting principles and applications, as well as a selection of key business courses to enhance the student's analytical and decision-making skills. The curriculum will prepare students for careers in public accounting, in business and in not-for-profit organizations. It will also provide a solid foundation for further graduate study.

The accounting degree is a 124-hour program. Students interested in sitting for the CPA (Certified Public Accountant) examination must complete a minimum of 150 hours of college credit. These extra hours can be completed through additional undergraduate or graduate level studies. Students are encouraged to work with their advisor in understanding the specific requirements of the state in which they plan to practice.

Business Administration Major

The business administration major combines theory with practical application to enhance the student's understanding of the dynamic business environment. The value and relevance of the Christian faith is integrated throughout all courses.

The degree program provides flexibility by allowing students to select an emphasis from a variety of concentration areas and minors. The business department seeks to develop students for effective service in business, not-for-profit organizations and government and to prepare them for graduate studies.

Economics & Finance Major

The study of economics provides students with a well-grounded liberal arts education, intentionally integrating the Christian faith with the study of economic activity. The economics major helps students develop skills in analysis and decision-making by thoroughly grounding them in the theory and practice of economic reasoning. The program prepares students to work in business, finance and public policy related fields and is especially appropriate for students planning to attend law school or graduate programs in economics, business and public administration.

The departments of history and contemporary society and psychology have developed five broad goals.

1. Students will be prepared for graduate study. This preparation will include a knowledge base in their chosen discipline(s), analytical and critical thinking skill, and study/research skills.
2. Students will develop interpersonal skills necessary for professional careers, including oral and written communication and understanding human behavior.
3. Students will grow in their understanding of the historical and social contexts of their lives and of the institutions in which they live.
4. Students will learn how to integrate disciplinary knowledge with Evangelical Christian faith.
5. Students will develop a "World Christian" perspective, which means they develop the ability to work in cross-cultural settings, as well as understanding how their lives and ministries fit into world missions.

In special cases, courses other than those listed below may be used as cognates or electives in the major and/or minor with documented approval of the student's academic advisor, the department chair and the dean of the School of Business and Social Sciences.

A limit of two graduate courses may be used as undergraduate cognates. Permission must be obtained from the academic advisor, dean and course instructor.

History & Contemporary Society

The department of history and contemporary society encourages and helps its majors to achieve the following goals:

- Acquire the specialized knowledge, the study and research skills specific to their discipline or major, and the analytical and critical thinking abilities expected of all liberal arts graduates.
- Grow in their capacity to present ideas and arguments in a persuasive manner, both in public speaking and in writing.
- Acquire a greater understanding of the historical, social and institutional contexts of current events (i.e., trends and developments in international affairs, politics, culture, economy and thought).
- Articulate the ways in which Christians have sought to integrate disciplinary knowledge with personal faith and theology.
- Explore what it means to approach their scholarly and professional identities from a "World Christian" perspective.

Psychology Department

Mission Statement

The Psychology Department of Bethel College is committed to the mission of the institution. We affirm our Christian responsibility to be a witness and participant in the discipline and in the contemporary world. In light of the college's mission, the psychology program has set as its goal to challenge the mind, to enlarge the vision, and to equip the student for lifelong service.

To these ends, we set as the learning outcomes for the department that each psychology graduate should:

1. Develop competency in the skills and knowledge of the discipline.
 - a. Basic skills
 - Speak and write effectively within the scope of the discipline
 - Utilize quantitative and qualitative research designs and methods
 - Utilize basic descriptive and inferential statistical procedures
 2. Think analytically and critically within the discipline.
 - a. Christian perspective
 - Construct and use a Christian world view of psychology
 - b. Theoretical frameworks
 - Compare and contrast theoretical frameworks
 - Evaluate the utility of a theory in practice
 - c. Critical issues in the discipline
 - Identify ethical issues
 - Understand and respect diversity
 - Articulate theoretical differences and controversies
 - Understand the application of the discipline in public policy
 - d. Research
 - Evaluate research designs and methods
 - Evaluate research results
 - Evaluate the appropriateness of basic inferential statistical procedures
 - Interpret basic inferential statistical results
 - Critique and consume research
3. Apply, analyze, synthesize, and evaluate knowledge and skills in experiential situations.
 - a. Internship
 - Apply basic knowledge and theoretical concepts in an experiential setting
 - Evaluate utility of theoretical positions within a practical setting
4. Be prepared to utilize knowledge and skills in a variety of settings including interpersonal relationships, employment situations, and/or graduate or professional school.
