

Department of PHYSICAL SCIENCES

Faculty:

Bryan J. Isaac, Ph.D.

Erwin Sucipto, Ph.D.

Majors:

Chemistry

Science Education

Engineering Science

Life Sciences

Math/Physics

Physical Sciences

(Engineering Combination Program)

Mission statement

Our purpose is:

To use the process of science to explore, investigate and discover the natural and empirical aspects of creation;

To promote the application of learning to engineering, chemistry, medical sciences, and other fields;

To glorify God by using His creation to know him and make him known.

Our goal is that students should be able to:

Gain the skills needed to understand and evaluate natural phenomena;

Develop critical thinking skills, applying them to solving real-world problems;

Be competent at investigative methods, instrumental techniques and analysis of data;

Explore the relationship between Christian faith and the physical sciences;

Be empowered with a sense of understanding, ownership and responsibility that promotes a lifelong learning process of application and discovery; and

Be empowered with, professional job skills, graduate school capabilities, or skills to join an engineering program.

Chemistry Major

This major is designed to prepare students for employment in the field of chemistry or for further study in medicine, chemistry, or biochemistry. The B.S. in chemistry is the common “working degree,” and graduates are ready for employment in the chemical industry, both locally and nationally.

Electives needed to complete the degree 20
124

* Upper level physics courses in digital electronics, statistical mechanics, analytical mechanics, quantum mechanics and astrophysics are available through the NICE consortium at nearby colleges.

B.S. Math/Physics (Engineering Combination Program)

Bethel College offers two cooperative engineering programs—one through the University of Notre Dame and the other through Trine University. A student enrolled for

PHYSICAL SCIENCES

either program completes three years of study at Bethel College and two additional years of study at the cooperating university selected. At the end of one year of satisfactory study at the university, Bethel College awards a B.S. degree in mathematics/physics, and at the end of the second year, the university awards a B.S. degree in engineering. As part of Bethel College's requirements, each engineering student must maintain a 3.0 cumulative grade point average; earn a grade of at least "C" in all courses in the major; and receive a favorable recommendation from the chair of the division of mathematics and computer science and the chair of the division of natural science and be accepted by one of the cooperating institutions. These are Bethel College's requirements and may not correspond to the cooperating institutions' requirements. The student should talk to one of Bethel's advisors of the engineering students about the current requirements of each of the cooperating universities. During the third year of study at Bethel College, the student must officially apply for admission to the cooperating university as part of the transfer process. Students interested in majoring in engineering should contact the office of admission and the divisional chairperson for further information regarding performance standards and available programs.
