

School of NURSING

The mission of the Bethel College School of Nursing is to offer high quality associate, baccalaureate, and master's programs in a Christ-centered academic environment that provide graduates with the knowledge, values and skills necessary to care for clients holistically. Our graduates are prepared to embrace a commitment to life-long learning, professional development and service.

NURSING PROGRAMS

Bethel College has two undergraduate nursing degree programs, an Associate Degree in Nursing (ADN) and a Baccalaureate Degree in Nursing (BSN), accredited by the National League for Nursing Accrediting Commission (NLNAC). The NLNAC is located at 3343 Peachtree Road, NE, Suite 850, Atlanta, GA 30326. The NLNAC can be contacted at 409-975-5000, fax 409-975-5020 or www.nlnac.org. Programs leading to RN licensure are accredited by the Indiana State Board of Nursing.

The purpose of the nursing programs at Bethel College is to prepare graduates in a Christian liberal arts setting to provide therapeutic nursing care. The ADN graduate is prepared to function in the roles of provider of care, manager of care, and member within the nursing profession while caring for individuals and families within a community context in various structured health care settings. The ADN program may be completed in 2-3 years for full-time students. Due to the design of this program, it is highly recommended that some required college courses be taken prior to the nursing courses. The nursing courses must be completed in five years. The LPN to ADN program is designed for LPNs who wish to complete their ADN. The LPN to ADN is offered as space permits as one summer and two semesters of course work. The LPN to ADN

must be completed within four years. The BSN graduate is provided with a broad foundation in the sciences and humanities to provide therapeutic nursing interventions to individuals, families, groups and communities in diverse health care settings. The BSN graduate is prepared to function in the roles of provider of care, designer/manager/coordinator of care and member within the profession of nursing. The BSN graduate has a foundation for graduate education in nursing. Two programs are offered leading to the BSN. The Baccalaureate Program (Track I) is planned for students who are beginning the study of nursing. It consists of a four-year curriculum, including general education and nursing courses with both didactic and clinical components. The nursing courses must be completed in seven years. The Baccalaureate Completion Program (Track II) is planned to meet the needs of the Registered Nurse who desires to continue preparation in nursing at the baccalaureate level. The time involvement is approximately four semesters and one summer of academic course work. The nursing courses must be completed in five years.

Students must be admitted to the college before applying to the nursing program. The applicant must rank in the upper two-thirds of his/her high school graduating class and have earned at least a 2.5 GPA (on 4.0 scale) in high school or previous college work (or a composite score of 50 on the GED). Satisfactory completion of college courses relevant to nursing may nullify unsatisfactory high school or GED requirements. SAT scores of 530 verbal and 510 math, ACT scores of 21 English and 19 math for traditional age applicants, or CPT of 104 sentence skills, 75 arithmetic and 57 algebra for adult applicants are required for ADN and BSN Track I admission. SAT/ACT scores are valid five years while CPT scores are valid two years from date of application to the nursing program. Required reading scores are 450 on the SAT and 17 on the ACT for traditional age applicants or CPT reading comprehension of 83 for adult age applicants. BSN Track II students must have an active RN license in the state in which they reside and an employer's verification of full- or part-time current practice and competency. Nurses who have not been actively practicing must pass a standardized test to validate current nursing knowledge. New graduates will be given conditional acceptance and must present an active RN license by the end of first semester nursing courses.

An essay on "Why I Want to Be a Nurse" is required for the ADN and BSN Track I programs while "Why I Want to Obtain a BSN Degree" is required for BSN Track II. LPNs applying for the LPN to ADN are required to write an essay on "Why I Want to be an RN." Admission to the nursing program is based on nursing admission criteria at the time of application to the program. Admitted students must submit a completed nursing health form signed by their health care provider, verify specific immunizations, obtain a criminal check, submit documentation of a current negative drug screen and complete an approved CPR course prior to beginning the clinical courses. LPN to ADNs must meet prerequisite requirements along with course requirements and obtain a score of at least 50 percentile on the NLN Acceleration Challenge Exam.

Only persons who have not been convicted of any act that would constitute grounds for disciplinary action under the State Board rules and regulations or of any felony that has direct bearing on their ability to practice competently may take the NCLEX-RN exam. Students taking the exam will be asked to disclose any kind of crime to which they pled guilty, including traffic violations. While a traffic violation does not prohibit licensure, other crimes require individual review by the Board and may prevent the graduate from taking the NCLEX-RN exam.

Students must pass all courses within their program with a grade of "C" or better to continue in the nursing program. This includes major courses, general education, cog-

nates and electives. Required Science courses may only be repeated once. Students must also maintain a cumulative GPA of at least 2.5 to continue and complete a nursing program. ADN and BSN Track I students must successfully complete all courses at one level before advancing to the next level. BSN-C students must adhere to the specified sequence of progression.

Clinical experiences are scheduled in area health care facilities, and each student is responsible for personal transportation to and from the assigned facility. Specific uniforms and equipment are required. Malpractice insurance is provided through the college policy to nursing students. BSN-C RN students must provide documentation of required immunizations, CPR course completion and RN licensure. They must also obtain a criminal background check and have documentation of a current negative drug screen. LPN to ADN applicants must provide proof of current LPN licensure and employment verification if applicable.

Must be completed before acceptance into program.			

Total Hours—72 credit hours are required for graduation. 36 credits of required cognates and general education may be taken at Bethel or transferred in. Hours may exceed 72 based on equivalency of transfer credit.

One credit hour of class is equivalent to 15 50-minute class hours. Three 60-minute hours of clinical for 15 weeks is equal to one hour of credit. Each science course must have a laboratory component.

Credit Policies

Transfer of Credit into BSN Completion Program

Credit for lower level nursing courses from an ADN or diploma program may be achieved in the following ways:

New Graduates of ADN or Diploma Programs—Graduates may receive up to 33 credit hours for lower level nursing courses upon RN licensure in Indiana and satisfactory completion of first semester nursing courses.

Actively Practicing Nurses—Nurses who are actively practicing and present validation of full- or part-time employment with employer verification of current practice and competency may receive up to 33 credit hours of lower level nursing credit.

Transfer of Credit into ADN and BSN Programs

Transfer of credit for courses taken elsewhere may be obtained through the following exams:

NUR	111/241	NLN Acceleration Challenge Exam (ACE)
NUR	111/231	NLN Basic Nursing Care I and II
NUR	112	Teacher-Made Test & NLN Psychiatric Nursing
NS	211	NLN Diet Therapy & Applied Nutrition
BIOL	214/215	NLN Anatomy & Physiology
NUR	232	Credit by Examination
NUR	224	NLN Pharmacology in Clinical Nursing
NUR	220/380	NLN Physical Assessment
BIOL	312	NLN Microbiology

A percentile score of 50 or higher is necessary on NLN examinations. A test may be repeated no more than one time. Physical Assessment may not be repeated. Satisfactory scores on these examinations are only accepted within three years from the date of examination. In addition to a satisfactory score on the examination, if the course has a clinical component, a skills validation process is required (ADN and traditional BSN). Students may petition to transfer credit for additional courses. Courses will be evaluated on an individual basis. Students may also petition to take teacher-made examinations which must be passed with a score of 76% or higher.

Credit for Nonnursing Course Work:

Students who apply to a nursing program may receive credit for nonnursing course work (including Nutrition and Pharmacology) under the college's general transfer policies, except that courses in anatomy and physiology, chemistry, pharmacology and microbiology must have been completed in the past seven years. A grade of C or better must have been received in all classes. Students may petition to receive credit for sciences more than seven years old through validation exams. An exception will be made for licensed practical or registered nurses who are actively practicing full- or part-time in nursing who present verification of current practice and competency.

Applicants who are not actively practicing nursing or who are from programs where Pharmacology and Nutrition were integrated throughout nursing content may receive validation credit by taking the NLN achievement tests.

Returning Students

Students who were in a Bethel nursing program previously and wish to return must apply for readmission, meet the admission criteria at the time of reapplication and have an interview at the time of return. Policies for returning students specified in the Nursing Student Handbook must be met including requirements for demonstrating retention of clinical skills and knowledge for each of the subject areas covered in nursing courses taken previously.

Grace College Nursing Program

Two of the Nursing majors are offered on the campus of Grace College, the ADN and BSN completion. Class work for both majors may be completed at the Grace campus.
